Experiment -4

Library Book Reservation System (SIMATS Library) Using Zoho One (SaaS)

Aim

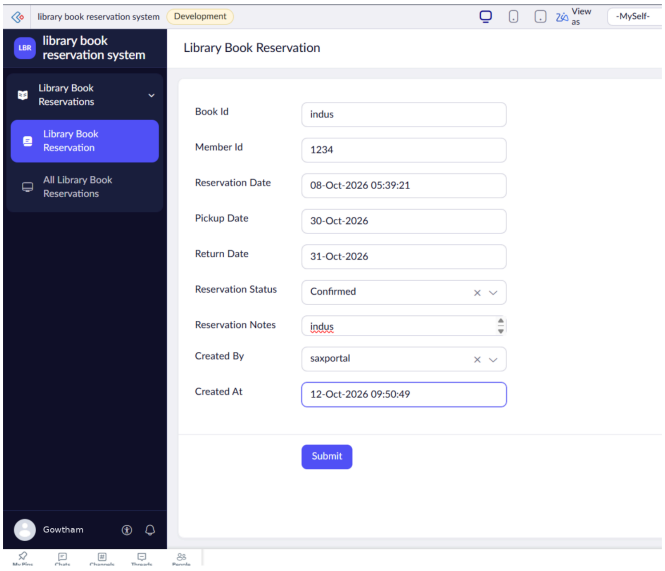

To create a simple Library Book Reservation System for the SIMATS library using Zoho One as a cloud-based Software as a Service (SaaS) application

Procedure

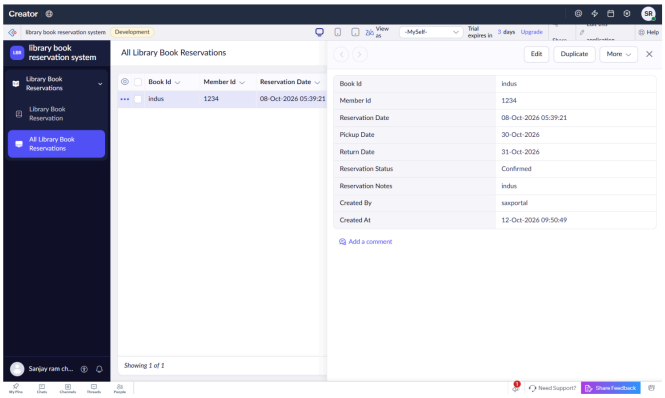

1.Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One applications.
3. Create a new application for the Library Book Reservation System.
4. Create a new form named Library Book Reservation.
5. Add the required fields: Student Name, Author, Publications, Year, Edition, Number of Copies, Rack No,
and Status (Taken/Returned).
6. Configure the field types according to the data required.
7. Design and arrange the form for easy user interaction.
8. Save and publish the form.
9. Enter sample SIMATS library book reservation details into the form.
10. Submit the form and verify that the entered record is stored in the cloud.
11. Test the application with different books and reservation statuses.
12. Verify that the Library Book Reservation System works successfully as a SaaS application.

Implementation Input and Output

Implementation Input:

Output:

Thus, a Library Book Reservation System (SIMATS Library) was successfully created using Zoho One and demonstrated as a Software as a Service (SaaS) application. The required fields were entered, the sample record was submitted, and the stored output was verified in the cloud.
