Experiment -8

STUDENT COUNSELLING SYSTEM USING CLOUD (SaaS)

Aim

To create a simple cloud web application for **Student Counselling System** using any Cloud Service Provider to demonstrate SaaS.

Procedure

1. Log in to the Cloud Service Provider.
2. Create a new cloud application for Student Counselling.
3. Create a student counselling form.
4. Add the required fields:

- Student Name
- Age
- Address
- Phone
- Subjects Studied
- Year of Passing
- Percentage of Marks
- Domain Interest

3.Configure the appropriate field types.

4.Design and arrange the form.

 Save and publish the application.

 Enter sample student details.

 Submit the form and verify that the data is stored in the cloud.

 Test the application with different student records.

 Verify that the application works successfully as a SaaS application.

Implementation Input:

Output:

Result

Thus, a **Student Counselling System** was successfully created using a Cloud Service Provider and demonstrated as a SaaS application..
